

DSL is high-performance broadband with reliability your business can count on.

Benefits

High-performance Network

Superior Customer Support

Fully Monitored and Managed

Speed You Need, When You Need It

Product Summary

Wyoming.com DSL services provide download speeds up to 15 Mbps over a statewide, redundant and privately-managed network that optimizes performance and security. DSL is an ideal broadband solution for small and medium-sized businesses that download large files or use the Internet extensively, as well as branch offices and remote workers. We offer a variety of DSL service options to meet the unique needs of your business.

Shared Loop DSL

Allows information to flow asymmetrically up to 15Mbps/1Mbps for quicker email delivery and file downloading.

Dedicated DSL

Gives you the same speed, reliability, and throughput of Shared Loop DSL *without* phone service from the local phone company. **The** DSL option for combining with WyoPhone services.

DSL Service Options

Wyoming.com DSL services include the following:

- Chose from 1.5Mbps, 2.5Mbps, 5Mbps, 10Mbps, or 15Mbps;
 - Up to 2 Static IP Addresses included at no additional charge;
 - DSL Modem provided at no additional charge;
 - Up to 5 Email Addresses included at no additional charge;
