

## Combine Voice and Data on a single connection

Wyoming.com WyoPhone enables businesses to reduce costs and simplify IT management by combining their phone service and Internet access over a single Internet connection. Businesses can control costs using a single connection and leveraging their current PBX or phone system.

---

### Benefits

Purchase only one connection for voice and data

Save up to 45% over traditional phone services

Buy only the lines you need

Use your existing phone equipment

Keep more bandwidth with voice compression

High-Performance Network with Quality of Service (QoS)

---

### Flexible Bandwidth Options

By selecting any Wyoming.com high-speed Internet service combined with WyoPhone, customers benefit from our voice-optimized network ensuring reliable connectivity while providing consistently clear voice quality.

### Reduce Costs

WyoPhone is significantly less expensive than traditional phone lines and PRI connections. By combining voice and data traffic over a single broadband connection, WyoPhone eliminates the need to purchase separate voice and data circuits. Because Wyoming.com WyoPhone works with your existing PBX or phone equipment and data network, there is no need to replace phones or equipment. Unlike PRIs, you purchase only the trunks you need based on your maximum number of concurrent calls. We offer a number of WyoPhone packages and service options that include lines, unlimited local calling, the best long-distance bundles in Wyoming, Toll-Free services and DID numbers – all designed to reduce your costs.

### 24/7/365 Support

Our experienced NOC team is available around the clock to answer any questions that arise. We will support you after hours, on weekends, and on holidays to keep your connection up and running.

## Optimize Bandwidth

When customers purchase Wyoming.com WyoPhone and broadband access, our connection technology can automatically adjust the amount of bandwidth dedicated to voice and data in real time. When the phones are idle, you can access the full bandwidth for data. When calls are made or received, your bandwidth is reallocated to voice services for as long as users are on the phone. In the Wyoming.com network, WyoPhone always has the highest priority.
