

EtherLink delivers high-speed, business-class bandwidth for much less than T1, fractional T3, and other provider's Ethernet services

EtherLink provides reliable, business-class bandwidth from 2 Mbps up to 45Mbps for a much lower cost than DS3 access, comparable Bonded T1 service, or Ethernet services from the Phone and Cable companies. Wyoming.com's EtherLink is a fully-managed solution backed by our service level agreement. If your business has intensive Bandwidth demands, there's no better value.

Benefits

Lower Cost

Superior 24/7/365 Support

Symmetrical Speed

High-Performance Network

High-Performance Bandwidth

EtherLink delivers a robust, dedicated connection with a choice of symmetrical speeds and is fully scalable to meet the growing demands of your business. This solution is ideal for businesses that:

- Use bandwidth-intensive applications;
- Transmit large data, image, or video files;
- Run servers for websites, email, databases, or applications;
- Support remote workers or VPNs;
- Require or need networking solutions such as MPLS VPN or EtherLink LAN;
- Require Voice/Phone Services with Quality of Service;
- Push the limits of their existing Internet access service.

Proactive Monitoring

Wyoming.com is actively monitoring the status of your connection to our network to maximize the availability and minimize the mean time to restore for your connectivity should an issue arise – just like we monitor and maintain our own network.

24/7/365 Support

Our experienced NOC team is available around the clock to answer any questions that arise. We will support you after hours, on weekends, and on holidays to keep your connection up and running.

Easy Installation

EtherLink connects to your existing infrastructure and utilizes reliable copper loop bonding technology to ensure rapid deployment and a seamless connection.

Reliability

EtherLink comes with the 99.999% uptime and 100% port speed; just like our T1 and T3 services.

EtherLink Service Features

FEATURE	DETAILS
Ethernet Technology	EtherLink uses loop bonding technology which is an effective new technology that reduces overhead and deals with loop failure more efficiently. That means more bandwidth remains available for applications and your connect is less likely to suffer if one loop fails.
Speed	Symmetrical speed options start at 2Mbps up to 45Mbps, in 1Mbps increments. You can choose the symmetrical connection speed that suits your business best.
IP Addresses	Includes a block of 14 static IP addresses.
Proactive Monitoring	Wyoming.com identifies and resolves your connection issues 24/7/365 – often before you are aware of them.
Equipment	Layer 2 bridge necessary. This item is not included and needs to be purchased but is much lower cost than router for T1 or T3 services.
Service Level Agreement	Our service level targets are financially backed by available invoice service credits. 99.999% uptime SLA.
Support	Specialized, dedicated NOC support 24/7/365. A dedicated NOC team will respond after hours, on weekends, and on holidays in the event of an outage.
