## Product Summary

Wyoming.com DSL services provide download speeds up to 15 Mbps over a statewide, redundant and privately-managed network that optimizes performance. Wyoming.com DSL is an ideal broadband solution for home users that download large files or use the Internet extensively. We offer a variety of DSL service options to meet the various needs of Wyoming home Internet users.

### Shared Loop DSL

Allows information to flow asymmetrically up to 15Mbps download and 1Mbps upload for quicker email delivery, web browsing, video and file downloading.

### Dedicated DSL

Gives you the same speed, reliability, and throughput of Shared Loop DSL *without* phone service from the local phone company. **The** DSL option for bundling with Wyoming.com WyoPhone services.

## DSL Service Options

Wyoming.com DSL services includes the following:

- Chose from 1.5Mbps, 2.5Mbps, 5Mbps, 10Mbps, or 15Mbps;
  - DSL Modem provided at no additional charge;
  - Up to 5 Email Addresses included at no additional charge;
  - Phone Service from local phone company required only with Shared Loop DSL.
-
