REACHING NEW
HEIGHTS FOR
WYOMING

MPLS VPN links business locations together with secure converged connections.

Give employees and operations in other locations the same fast, reliable, secure, and cost-effective access to information and enterprise applications with Wyoming.com MPLS VPN service.

Benefits

High-performance Network

Superior 24/7/365 Support

Quality of Service

PCI Compliant

Quality of Service

Direct MPLS paths enable us to provide Quality of Service (QoS), ensuring that business-critical applications like Voice over IP, enterprise applications, and credit card transactions are prioritized for the highest level of quality.

Superior Performance

With site-to-site, site-to-multisite, or fully-meshed private paths, Wyoming.com MPLS VPN service reduces the time and distance data travels, resulting in faster communication and increased productivity for your business.

High Availability

With MPLS VPN, your sites leverage Wyoming.com's fault-tolerant network, promoting uptime and performance.

Maximum Security

With MPLS VPN, your sites are connected via a private network, so they are less susceptible to Internet-based attacks. We provide your business with a private MPLS routing domain, and we maintain secure Internet gateways to block viruses, spam, and hackers.

Bandwidth Choice

We offer a full range of business-class DSL, EtherLink, T1 and T3 broadband solutions. We can work with you to provide every site with the right bandwidth at the right price, so you don't have to manage multiple access vendors.
