

T1 Services provide fast, reliable broadband access

Keep your business connected and your employees productive with T1 service designed specifically for business-critical performance. We provide reliability and industry-leading service level agreements to meet your business needs today and tomorrow.

Benefits

Designed for Business

Superior 24/7/365 Support

High-performance Network

Competitive Pricing

High-Performance Bandwidth

T1 broadband is an excellent choice for businesses with mission-critical Internet service and Voice requirements. We can also bond multiple T1 lines into seamless connections up to 12x12 Mbps using our EtherLink technology, providing robust connectivity for businesses that:

- Use bandwidth-intensive applications;
- Transmit large volumes of data, images, or video;
- Run their own Web, email, database, or application servers;
- Require Voice/Phone Services with Quality of Service;
- Push the limits of their existing Internet access service.

Proactive Monitoring

Wyoming.com is actively monitoring the status of your connection to our network to maximize the availability and minimize the mean time to restore for your connectivity should an issue arise – just like we monitor and maintain our own network.

IP Addresses

Your T1 service comes with fourteen static IP addresses. Business often use static Public IPs for running website, email servers, or virtual private networks (VPNs). Additional IP addresses can be purchased as your business needs evolve.

T1 Service Features

FEATURE	DETAILS
Connection	Each T1 connection is provisioned with an industry-standard DS1 circuit.
Speed	Eight speed options from 1.5, 3.0, 4.5, 6.0, 7.5, 9.0, 10.5, and 12.0 Mbps
Proactive Monitoring	Wyoming.com identifies and resolves your connection issues 24/7/365 – often before you are aware of them.
Equipment	Choose a new business-class router from Cisco for serial connectivity, or a new Zhone T1 Network Extender using EtherLink technology. Our Engineering Team will program the device to specifications. You can use your own router if it meets our requirements.
Service Level Agreement	Our service level targets are financially backed by available invoice service credits. 99.999% uptime SLA.
Support	Specialized, dedicated NOC support 24/7/365. A dedicated NOC team will respond after hours, on weekends, and on holidays in the event of an outage.
